

BioFit FBT™

A Fresh Approach Designed to meet Ever-Changing needs in Educational Environments

Social interaction and communication take place between and among learners and instructors, as well as content, and play an important role in learning. The FBT Series of fold & roll booths are specifically designed to be rapidly deployed to form a self-contained place within a space to facilitate social interaction and sharing of ideas among small groups.

Available in seven configurations, the FBT Series of fold & roll booths are easy to deploy, making floor plan changes nearly instantaneously, fold, roll and store, nesting 10 FBT units when not in use in 15 linear feet.

Low partition FBT booths create a sense of local intimacy yet facilitate greater interaction with occupants in the surrounding area and enable observation of users across larger spaces such as cafeteria environments or libraries.

Specific models of low-partition FBT booths may include onboard power and charging station, or a standard “lift & lock” leaf option to increase occupancy or one designed to meet the Americans with Disabilities Act (ADA) requirements.

FBT booths configured with full height-partitions provide additional privacy and may offer onboard power for electronics and accommodate a 32-inch monitor for use with digital educational aids or in hybrid learning applications. The FBT™ Series of Fold & Roll Booths was recognised with a second-place industry innovation award at EDspaces 2023 in Charlotte, North Carolina.
